

Alistair Bishop

Enborn, Leckhampstead RG20 8QQ | 07547 660184 | alistairbishop@gmx.co.uk | github.com/AlistairBishop06 | alistairbishop06.github.io

BSc Computer Science student predicted First, with practical experience in networking, software development, teaching and customer-facing work. Strong portfolio of personal projects across games, simulations, AI, networking tools, mobile apps and web development.

EXPERIENCE

Network Engineer, Newbury Academy Trust / Nov 2023 - Dec 2023

- Assisted in configuring, maintaining and troubleshooting network infrastructure, including routing, switching and structured cabling.
- Gained practical understanding of Active Directory forests and their role in company network administration.
- Worked alongside senior engineers to improve system reliability and security, producing over 30 new network nodes under strict policy guidelines.

Lifeguard, Everyone Active SLM / Mar 2023 – May 2025

- Monitor poolside safety, respond promptly to incidents and provide first aid or emergency support where required.
- Maintain health and safety compliance while developing vigilance, teamwork and calm decision-making under pressure.

Cafe Assistant, Cobbs Farm Café / Dec 2025 - Present

- Served customers, handled orders and supported food and drink service in a busy cafe environment.
- Developed customer service, time management, hygiene awareness and the ability to stay organised during peak periods.

Workshop Leader, ExCode / Oct 2025 - Dec 2025

- Taught Python to around 25 students, supporting them from beginner level to examination-ready proficiency.
- Improved communication, problem decomposition and collaborative programming skills within the UK's largest student-led coding bootcamp.

EDUCATION

University of Exeter, EX4 4PY / Jun 2027

BSc Computer Science - Predicted First

Trinity School Sixth Form, RG14 2DU / Aug 2024

A Levels: Mathematics (A), Computer Science (A), EPQ (A), History (B)

Trinity School Newbury, RG14 2DU / Aug 2022

GCSEs: History (9), English Literature (9), English Language (8), Biology (8), Chemistry (8), Physics (8), Mathematics (8), Geography (8), Citizenship (8), Computer Science (7)

TECHNICAL SKILLS

Languages: Python, Java, C#, Kotlin, JavaScript

Networking: Routing, switching, diagnostics, Active Directory fundamentals

Development: OOP, debugging, testing, Git/GitHub, agile collaboration

Web & Apps: Full-stack development, REST APIs, responsive UI, Android, Node.js

Systems: Hardware/software troubleshooting, Microsoft Office, IT support

Professional: Leadership, communication, teamwork, adaptability, customer service

SELECTED TECHNICAL PROJECTS

Portfolio: Built and maintained a broad range of personal and university projects, using them to practise problem solving, independent learning and production-style software habits. These are all stored on my portfolio website with the style of books in a library, which you can see [here](#).

- Chaos Chess and interactive web games:** Designed rule-based gameplay systems, browser interfaces and state management for projects such as Chaos-Chess, battleships and Silly-Sorting-Web-Game. Learnt to break complex behaviour into maintainable components and the node.js app pipeline.
- Net Tool Hub and utility projects:** Created practical tools such as Net-Tool-Hub, Local-cheapest-fuel-map and Youtube-Keyword-Scraper, working with data extraction, scraping, APIs and user-focused tool design. Learnt to build software around real user tasks rather than only technical experiments.
- AI, simulation and procedural systems:** Built projects including AI Mario, Python-Cloth-Sim, World-Generator-and-Explorer, LIDAR and Optimised-Parking-Simulation. Strengthened algorithmic thinking, maths/physics application, spatial data handling and performance-aware design.

- **Mobile, web and deployment work:** Developed Kotlin-Weather-App, Lightweight-Ruby-Blog, Template-Space-Website and a personal portfolio site. Learnt API integration, responsive UI design, deployment and how to present technical work clearly online.
- **University and team projects:** Completed TeamProjectCOM2020, JavaCardGame-ECM2414 and java-messageboard, applying object-oriented design, version control, team workflows and structured software engineering practices in an academic setting.

LEADERSHIP & ACTIVITIES

- Elected Head Boy for both secondary school and sixth form, demonstrating leadership, communication and organisational skills.
- Self-taught programmer with extensive personal project experience across software, AI, simulation, games and web development.
- Participated in collaborative coding projects and game jams, strengthening teamwork and rapid problem-solving skills.
- Continuously expanding knowledge in full-stack development, networking and professional software engineering practices.

TRAINING

First Aid; Action Counters Terrorism Awareness (ACT); Mental Health Awareness; Hidden Disability Identification; Customer Services; Health & Safety in the Workplace; Safeguarding; Diversity, Equity, Inclusion & Belonging (DEIB); Data Protection & IT Security; Sustainability Schemes.
